

The Fusion Process

Streamline Capture from Start to Finish.

How prepared are you?

If you think you've reached your productivity potential - think again. Outdated capture strategies and primitive legacy scanners hold you back from realizing your mailroom's ultimate performance threshold. Transform your mailroom into a powerhouse of speed and intellect with the new standard of ultra-high-volume efficiency: **the ibml FUSION™ Series.**

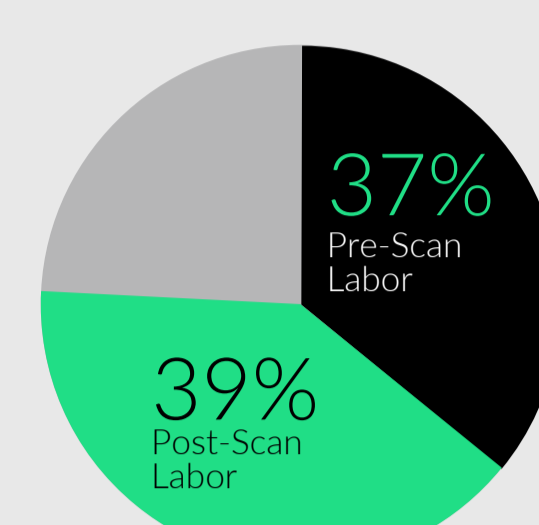

1

Consolidates to Accelerate

- Run** all your document types - big and small - together at high speeds and high volumes.
- Eliminate** tedious manual feeding.
- Remove** the need for multiple legacy capture devices.

76%

of the total cost of scanning is wasted on pre- and post- document sorting and handling.

2

20%

Faster Than Anything In It's Class

67%

Faster Than the Previous Model

Quicker Capture, Quicker Throughput

Process more documents daily.

Capture critical information from both structured and unstructured documents faster using **next-generation cameras** - no more sluggish scanning.

3

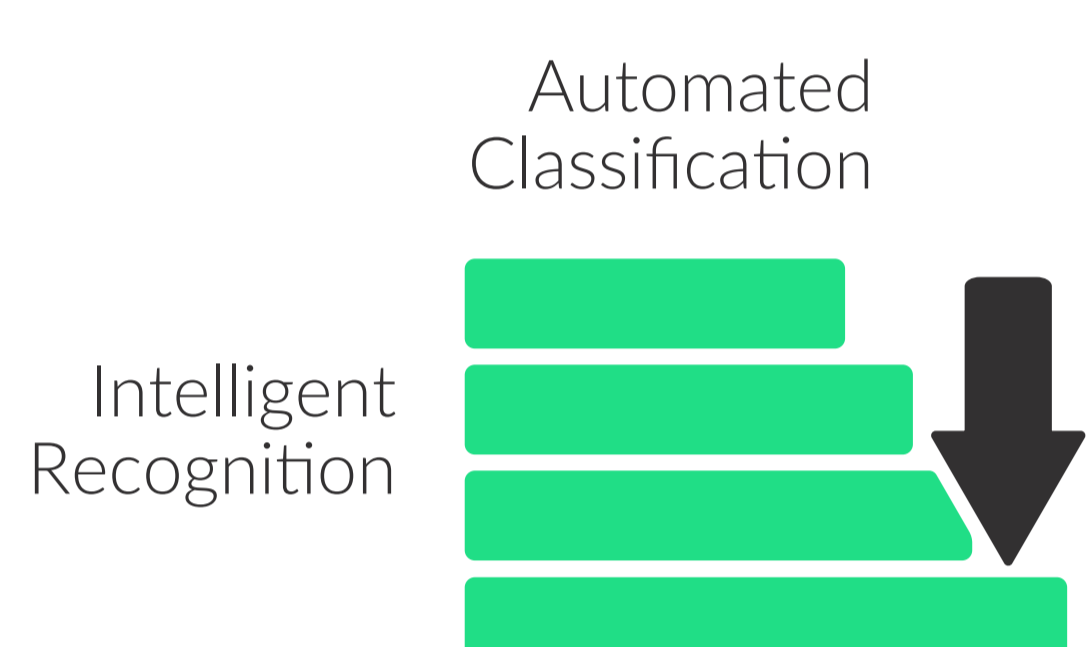

Exception-Exposing Technology

Vigilant software improves **exception handling** by flagging missing fields and signatures, speeding up customer turnaround times.

- Unfilled Critical Fields
- Missed Signatures
- Streaks
- Handwriting

4

Stunningly Smart Software

Sync extracted data to downstream systems faster with intelligent recognition and automated classification capabilities - **empowering you with quicker access to vital information.**

5

Automated Auditing, Air-Tight Security

High quality imprinting capabilities and automated audit trails ensure iron-clad adherence to security and compliance standards. **Now when you get requests for information, you're ready.**

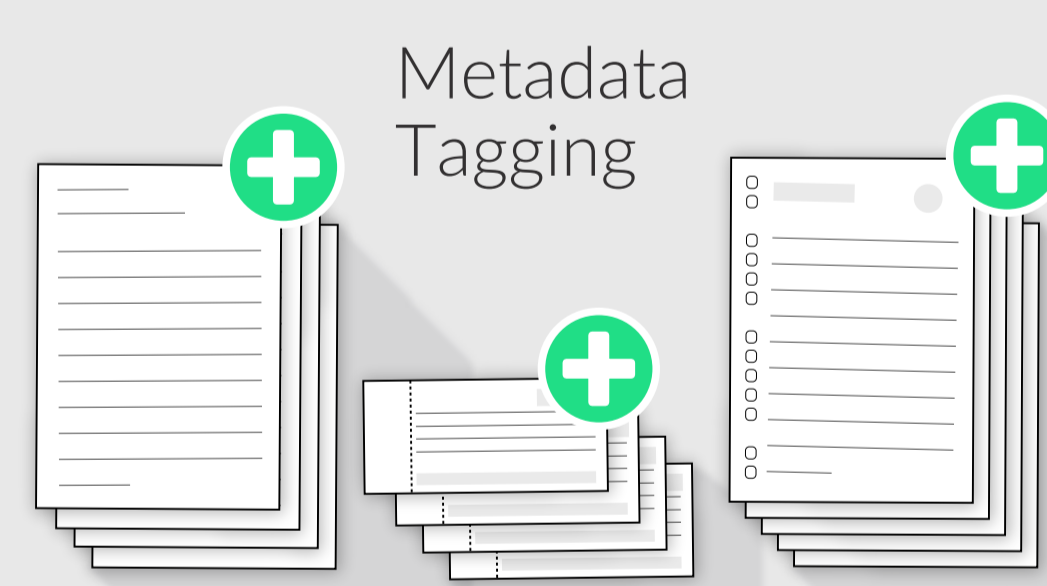

6

Up to 24 Customized Sorting Pockets

Supercharged Intelligent Sorting

Smarter sorting and automated pocketing settings allow you to minimize costly post-scan manual labor and keep crucial documents organized.

Neatly Stacked Documents & Mission-Critical Data Ready to Use.

Overhaul Your Performance Potential.

Consolidate

Reclaim budget that gets wasted on maintenance, real estate, and labor costs by consolidating to one omni-powerful infrastructure.

Accelerate

Redefine your productivity threshold with the ability to adapt, customize, and scale your device at will.

Outperform

Reach the next level of efficiency with a multitude of features that improve operator productivity and minimize equipment downtime.

**Fuse Your Processes.
Fuel Your Productivity.
Harness the Power of the World's Fastest Scanner.**
